

Maria Bogdanova

Frontend developer

Frontend engineer with over 2 years of expertise in JavaScript, with mentorship and team work experience. Proficient in React, Redux, TypeScript, with hands-on experience in testing React applications. Committed to high code quality standards and effective communication. I consider myself a fast learner, hardworking, self-organized person with a passion for continuous growth and learning.

Work Experience

Frontend software engineer, Internship RS School, 2023

- Created an e-commerce application for online postcards store using React, Redux toolkit, TypeScript, AntDesign, Commerce tools SDK
- As a team lead, I organized the team's work using Jira
- Extensively covered code with unit tests using Jest
- Conducted extensive refactoring using ESLint, Prettier
- Had a mentorship support

Frontend software engineer Website for Solimare salt cave, 2023

- Utilized Next.js for creating SPA with server-side rendering
- I was involved in every aspect of the application, from planning and client interaction to development, refactoring, hosting, and ongoing application support
- I carefully selected the most suitable UI and UX solutions, considering client preferences and heeding the designer's recommendations
- Had a mentorship support
