

Maria Bogdanova

Frontend developer

Proactive frontend engineer with over 3 years of expertise in JavaScript, with mentorship and team work experience. Proficient in React, Redux, Next.js, TypeScript, with hands-on experience in testing. Committed to high code quality standards and effective communication. I consider myself a fast learner, hardworking, self-organized person with a passion for continuous growth and learning.

Work Experience

Frontend software engineer, Internship RS School, 2023

- Created an e-commerce SPA for online postcards store using React, Redux toolkit, TypeScript, AntDesign, Commercetools SDK
- As a team lead, I organized the team's work using Jira
- Extensively covered code with unit tests using Jest
- Conducted extensive refactoring using ESLint, Prettier
- Had a mentorship support

Frontend software engineer, freelance since 2020 My last Project, 2023

- Utilized Next.js for creating a website with server-side rendering
- I was involved in every aspect of the application, from planning and client interaction to development, refactoring, hosting, and ongoing application support
- I carefully selected the most suitable UI and UX solutions, considering client preferences and heeding the designer's recommendations
